Pre-Installation Warranty

It is the duty of the installer, whether professional or DIY (do it yourself), to inspect all flooring before installation. If during inspection the installer or buyer feels the floors is the wrong color, improperly manufactured, is off-grade or is the wrong gloss level, he/she should NOT install the flooring. Please immediately contact the retailer from which the flooring was purchased. No claims will be accepted for flooring which is visibly wrong if such flooring is installed. Installed flooring is deemed to be visibly acceptable.

Moisture Warranty

Lamett warrants the LVP/LVT flooring in its original manufactured state to the original purchaser from the date of purchase, under normal residential use, that the surface, when properly installed, shall be resistant to damage from normal household spills resulting in discoloration or structural decomposition. The Moisture Warranty does not cover flooding, standing water, leaking pipes, household mechanical failures, appliance leaks or pet urine.

A gap is defined as seam separation along the long or short end of the plank under normal commercial use.

A gap must be bigger than the thickness of a business card (> 10 mils) and longer than the short side of a business card (<2").

Installation over Radiant Heat Subfloors:

We warrant to you (the original purchaser) that this Luxury Vinyl flooring may be installed over water-based radiant-heated subfloors, provided the surface temperature of the system does not exceed 81 degrees Fahrenheit (27 degrees Celsius). **IMPORTANT:** Due to the speed of sudden temperature changes, which has potential to negatively affect vinyl flooring construction, it is not recommended to install over electrical radiant heating systems. This will not be covered by the manufacturer's warranty. Only radiant heating system using water are acceptable.

Before installing over newly constructed radiant heat systems, operate the system at maximum capacity to force any residual moisture from the cementitious topping of the radiant heat system. Then set the thermostat to a comfortable room temperature for the installation. It is recommended that the radiant heat be applied in a gradual manner after installing the Luxury Vinyl flooring. Refer to the radiant heat system's manufacturer recommendations for additional guidance.
